## 1.0 Foreword

We are delighted to present our first Patient Safety Incident Response Plan (PSIRP) for **Lancashire Teaching Hospitals NHS Foundation Trust**. This plan sets out how we intend to respond to patient safety events in line with the National Patient Safety Strategy for England and the Patient Safety Incident Response Framework (PSIRF).

The PSIRF is a new and innovative approach to how the NHS responds to patient safety events. This is not a change which involves us doing the same thing. It is a cultural and system shift which fundamentally changes our thinking and response to patient safety events and how we work to prevent a safety event happening again.

Our challenge is to move the focus away from investigating safety events to produce a report because it might meet specific criteria in a framework and instead, towards an emphasis on the outcomes of patient safety incident responses that support our learning and continuous improvement methodologies to prevent safety events happening again.

Where previously we have had set timescales and external organisations have needed to approve what we do, PSIRF gives us a set of principles that we will work to and although this could seem daunting, we welcome the opportunity to take accountability for the management of our responses to patient safety events with the aim of learning and improvement.

We know that we investigate safety events to learn but acknowledge that the focus on this may have been lost due to the previous emphasis on the production of a report, as that is how we have been measured, rather than on showing how we have made meaningful changes to keep our patients safe.

Through the implementation of PSIRF we commit to meaningfully engaging with our patients, service users, families and carers to ensure that their voice is the golden thread in all of our patient safety investigations. PSIRF sets out best principles for this involvement and our move to engaging with patient safety partners will make sure that the patient voice is heard at all stages of our patient safety processes.

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

Our recent work in moving towards a restorative and just culture underpins how we will approach our response to patient safety events. We are an organisation who fosters a culture in which people feel they can highlight patient safety events knowing they will be psychologically safe.

PSIRF asks that we have conversations where people have been affected by a patient safety event, no matter how difficult that is, and we will continue work on how we can equip and support those affected to best hear the voice of those involved. The process of reviewing a safety event can help our staff validate the decisions they made in caring for and treating a patient and facilitate psychological closure, these are part of our PSIRF core objectives.

As we move into adopting this new way of managing our patient safety learning responses, we accept that we may not get it right at the beginning, however we will continue to monitor the impact and effectiveness of our PSIRF implementation, responding and adapting as needed if our approach is not achieving what we expect it to. In this we have been supported by our commissioners, partner providers and other stakeholders to allow us to embark on this nationally driven change.

Most importantly though, PSIRF offers us the opportunity to learn and improve to promote the safe, effective and compassionate care of our patients, service users, their families and carers whilst also protecting the wellbeing of our staff. We welcome PSIRF's implementation and are ready for the challenges ahead.

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

## 2.0 Purpose

This patient safety incident response plan sets out how **Lancashire Teaching Hospitals NHS Foundation Trust** intends to respond to patient safety events over a period of 12 to 18 months. The plan is not a permanent rule that cannot be changed. We will remain flexible and consider the specific circumstances in which patient safety issues and safety events occurred and the needs of those affected.

This document should be read in conjunction with the Trust's [Patient Safety Incident Response Policy](#) which supports the requirements of the NHS England Patient Safety Incident Response Framework (PSIRF) and sets out how the Trust will approach the development and maintenance of effective systems and processes for responding to patient safety events and issues for the purpose of learning and improving patient safety. One key aim of PSIRF is to ensure considered and proportionate responses to patient safety events.

## 3.0 Scope

This patient safety incident response plan (PSIRP) will detail the Trust's approach to responding to patient safety events and should be followed by all staff across the organisation. This plan is not a permanent tenet that cannot be changed. We will remain flexible and consider the specific circumstances in which patient safety issues and safety events occur and the needs of those affected.

## 4.0 Our services

Lancashire Teaching Hospitals NHS Foundation Trust is a large acute NHS Trust consisting of Chorley and South Ribble District General Hospital, Royal Preston Hospital, the Specialist Mobility Rehabilitation Centre, Finney House Community Care Hub and a range of community and satellite services.

We serve a core population of around 395,000 people across Chorley, Preston and South Ribble as well as providing a range of highly specialist services to 1.8 million people across Lancashire and South Cumbria.

Our organisation has a workforce of approximately 9000 substantive staff, making it one of the largest employers in the region and a successful volunteers scheme, with nearly 600 volunteers providing support in a variety of roles.

Royal Preston Hospital provides a full range of district general hospital services including emergency medicine, critical care, general medicine including elderly care, general surgery, oral and maxillo-facial surgery, ear nose and throat surgery, anaesthetics, children's services, neonatal intensive care, women's health and maternity, and several specialist regional services including cancer, neurosurgery,, renal, plastics and burns, rehabilitation, and the major trauma centre for Lancashire and South Cumbria. The urgent care centre on the site is directly commissioned by the ICB and is not provided by this Trust.

Chorley and South Ribble Hospital provides a full range of district general hospital services including emergency department for adults (8am-8pm) coronary care, general medicine including elderly care, general surgery, orthopaedics, anaesthetics, stroke rehabilitation, midwifery-led maternity care, and a breast service. The urgent care centre on the site is directly commissioned by the ICB and is not provided by this Trust.

The Trust is a regional specialist centre for cancer, child neurology, disablement services, immunology, neonatal intensive care, neurosciences, major trauma, renal, respiratory, vascular and maternal medicine.

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

The Surgical Elective Care Hub based at Chorley and South Ribble Hospital is where patients come for day case or short inpatient surgery stays and has received the highly accredited 'NHS Surgical Hub status', meaning that our patients can be assured of the highest standards of patient care and safety, with the Getting it Right First Approach (GIRFT).

Our specialist mobility rehabilitation centre provides specialist wheelchair, prosthetic limb and orthotic services for people across the Northwest, including war veterans and is one of just nine centres of excellence in the UK.

Lancashire Community Healthcare Hub, also known as Finney House, provides residential and nursing care services in a purpose-built home. The Trust took over the lease of the building in November 2022 to become the CQC-registered provider of services, taking on all 96 beds at the facility. The first floor (Buttercup) and second floor (Meadow) allows the Trust to discharge patients from both Chorley and Royal Preston Hospitals who no longer need the specialist care provided in an acute bed, freeing up much needed space for those who need urgent and emergency medical care. There are a further 32 beds on the top floor (Orchard) which allow the Trust to continue to provide care for Local Authority or private residents. People with dementia are also looked after at the facility.

Our community services are provided in people's homes, community centres, clinics, GP Practices, community hospitals and our main hospitals.

We are the only National Institute for Health and Care Research (NIHR) Clinical Research Facility in Lancashire and South Cumbria. The Centre for Health Research and Innovation is based within the Lancashire Clinical Research Facility at Royal Preston Hospital. However, the Research team work across both the Preston and Chorley sites as well as a number of community and satellite units. The Trust is also a leading provider of undergraduate education and a leading partner in the Lancashire and South Cumbria Provider Collaborative.

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

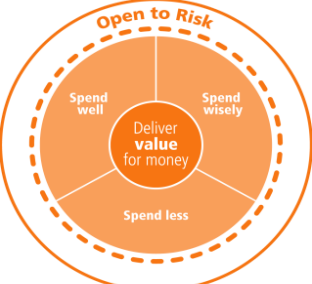

We are registered with the Care Quality Commission (CQC) without conditions to provide the following regulated activities:

- diagnostic and screening services
- maternity and midwifery services
- surgical procedures
- termination of pregnancies
- treatment of disease, disorder or injury
- management of supply of blood and blood-derived products
- assessment or medical treatment for persons detained under the Mental Health Act 1983
- accommodation for persons who require nursing or personal care.

Our mission is to always provide excellent care with compassion and our strategic aims are:

- To provide outstanding and sustainable healthcare to our local communities
- To offer a range of high-quality specialised services to patients in Lancashire and South Cumbria
- To drive health innovation through world class education, training, and research

These are underpinned by our four strategic ambitions which are as follows:

<p><b>Consistently Deliver Excellent Care</b></p> 	<p>Improve outcomes and reduce harm</p> <p>Get it right first time</p> <p>Positive patient experience delivered in partnership</p> <p>Ensure a safe, caring environment</p>	<p><b>Fit for the Future</b></p> 	<p>Transform services</p> <p>System leadership</p> <p>Develop our infrastructure</p> <p>Drive innovation</p> <p>Support healthy living</p>
<p><b>Deliver Value for Money</b></p> 	<p>Spend well</p> <p>Spend wisely</p> <p>Spend less</p>	<p><b>Great Place to Work</b></p> 	<p>Promote health and wellbeing</p> <p>Inform, listen, and involve</p> <p>Develop people</p> <p>Value each other</p>

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

We are a values-driven organisation. Our values were designed by our staff and patients and are embedded in the way we work on a day-to-day basis:

- Caring and compassionate: We treat everyone with dignity and respect, doing everything we can to show we care.
- Recognising individuality: We respect, value, and respond to every person's individual needs.
- Seeking to involve: We will always involve you in making decisions about your care and treatment and are always open and honest.
- Team working: We work together as one team, and involve patients, families, and other services, to provide the best care possible.
- Taking personal responsibility: We each take personal responsibility to give the highest standards of care and deliver a service we can always be proud.

To align specialities and services with clinical pathways and professional relationships, streamline processes and strengthen collaborative working the Trust has four clinical divisions. These are the Division of Medicine, Division of Surgery, Division of Women and Children Services and the Division of Diagnostics and Clinical Support Services and are supported by the Estates and Facilities Division and Corporate Services Division.

This highlights the variety and complexity of services provided by the Trust. It is therefore imperative for the successful implementation of the PSIRF that the plan reflects the breadth of patient safety concerns relevant to these services and that everyone is clear about how their individual role, responsibility and behaviour supports the delivery of this plan.

This will be achieved by drawing on data and intelligence to identify our PSIRF priorities (insights), by engaging with our patients, their families and carers, staff and stakeholders in our plans, equipping them with the skills and opportunities to improve patient safety throughout the whole system ('involvement') and designing and supporting programmes that deliver effective and sustainable change in the most important areas including reducing patient harms and improving our safety culture ('improvement').

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27

<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

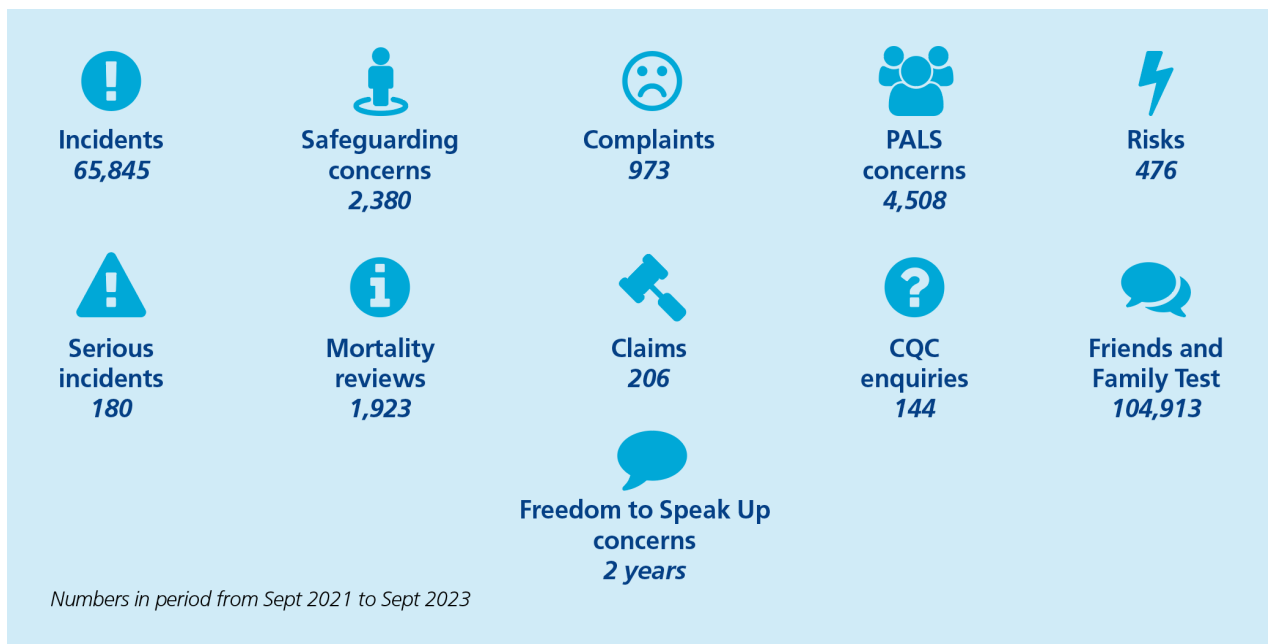

## 5.0 Defining our patient safety events profile

The Trust is committed to undertaking high quality learning responses following a patient safety event to ensure continuous improvement across our services and sustainable reductions in the frequency of incidents and their associated opportunity to harm our patients.

The national PSIRF sets out the opportunity for us to ascertain own local highest risk areas, and to ensure both investigation focus, and improvement resource is directed towards those areas of greatest risk and therefore need. These local priorities sit alongside national priorities that require continued focus, for example, safety events that meets the criteria of a ‘never event’.

### 5.1 Data Sources

The Trust recognises that in order to truly understand its patient safety profile it must review data from a variety of sources. A core element of the development of our PSIRP was to undertake a retrospective analysis of a minimum of two years of data, to include previously reported safety events and data sets such as claims, complaints and information from any relevant surveys. The summary below provides an overview of the sources and numbers of data analysed between September 2021 and September 2023.

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

The results from the retrospective analysis output identified twenty two patient safety event themes as potential areas for further investigation.

## 5.2 Stakeholder Engagement

The twenty two patient safety event types were circulated to a stakeholder group with representation from a range of groups and professions including staff, patients and external partners. Groups represented included patient groups (e.g., Healthwatch), governors, equality, diversity and inclusion ambassadors, workforce teams, a range of governance professionals, nurses, medical staff, allied health professions, the Integrated Care Board (ICB) and other key stakeholders.

The table gives an overview of the groups that took part in the stakeholder engagement with a total of 43 individuals taking part.

Group Represented	Numbers of people
Lancashire and South Cumbria ICB	1
Patient Safety Team	2
Infection, Prevention and Control	1
Senior Medical and Nursing Leadership	3
Corporate Governance Professionals	7
Divisional Governance Professionals	8
Patient Experience Team	3
Pharmacy	2

Clinical Placement and Support Team	1
Continuous Improvement Team	1
Safeguarding Team	1
Critical Care Outreach Representative	1
Workforce and Organisational Development	1
Divisional Management Team	4
Patient Representative	2
Patient Forum Representative	1
Healthwatch Representative	1
Governor Representative	1
Allied Health Professions Leadership Team	1

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

At the engagement session, stakeholders were invited to score the identified themes, using the criteria below to determine which local priorities would invoke the greatest amount of learning to improving patient safety.

Criteria	Considerations
Likelihood of Harm	<p>Staff were required to review the likelihood of harm based on a scale of 1 (Rare) – 5 (Almost Certain)</p> <p>Staff were required to consider the frequency of previous events in addition to the probability of events occurring in the future.</p>
Impact of Harm	<p>Staff were required to review the likelihood of harm based on a scale of 1 (Insignificant) – 5 (Catastrophic)</p> <p>Staff were advised to consider both the physical and psychological impact of harm if an incident was to occur.</p>
Confidence in Existing Improvement Work	<p>Staff were required to review the confidence in existing improvement work on a scale of 1 (Extremely Confident) – 5 (No Confidence at All)</p> <p>Staff were made aware of existing improvement work in relation to identified themes and were asked to consider their effectiveness.</p>
Potential for New Learning	<p>Staff were required to review the potential for new learning on a scale of 1 (No Potential for Learning) – 5 (Significant Potential for Learning)</p> <p>Staff were asked to consider what the potential for learning was within each identified theme.</p>

*\*criteria adopted from University Hospitals Morecambe Bay*

The full scoring guidance is available in Appendix 1.

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

The scoring was undertaken by individuals via a Microsoft Forms survey and the results subsequently analysed. From the analysis, a priority order emerged based on potential for learning.

The themes were then considered in further detail using previous quantitative and qualitative analysis to identify five key themes. Although some themes had a greater potential for learning, there were several themes where opportunities for learning could be considered as part of a different theme. From this exercise, five local priorities emerged.

When identifying the final five local priorities where possible, the Trust considered:

- any elements of the data that told us about inequalities in patient safety,
- pathways, processes or systems that cross-cut our services,
- existing improvement programmes and
- any new and emergent risks relating to future service changes and changes in demand that the historical data did not reveal.

### 5.3 Local Priorities

Through our analysis and stakeholder engagement, the Trust has determined 5 patient safety priorities. These priorities will be the focus of the Trust’s Patient Safety activity over the next 12-18 months but will be reviewed sooner if appropriate.

These patient safety priorities form the foundation for how the Trust will decide to conduct Patient Safety Incident Investigations (PSII) and other appropriate patient safety reviews.

The Patient Safety Priorities and rationale for selecting them are detailed as follows:

No.	Local Priorities	Rationale
1	Delayed recognition of a deteriorating patient, due to gaps in monitoring (including all pregnant women)	<ul style="list-style-type: none"> <li>- ‘Earlier recognition of deterioration’ identified as high potential for learning in stakeholder engagement.</li> <li>- Potential to identify learning related to: <ul style="list-style-type: none"> <li>• Communication between staff/teams</li> </ul> </li> </ul>

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

No.	Local Priorities	Rationale
		<ul style="list-style-type: none"> <li>• Delays in treatment</li> <li>• Failure/incomplete/insufficient monitoring of patient</li> <li>• Nutrition and hydration fluid balance</li> <li>• Maternity incidents</li> <li>• Communication – incorrect or insufficient monitoring</li> </ul> <p>which were all identified as other top areas with potential for learning.</p> <ul style="list-style-type: none"> <li>- Relates to pathways, processes or systems that crosscut our services.</li> </ul>
2	Delayed, missed or incorrect cancer diagnosis	<ul style="list-style-type: none"> <li>- ‘Delay in diagnosis’ identified as high potential for learning in stakeholder engagement.</li> <li>- Potential to identify learning related to: <ul style="list-style-type: none"> <li>• Communication between staff/teams</li> <li>• Delays in treatment</li> <li>• Communication – incorrect or insufficient monitoring</li> </ul> </li> </ul> <p>which were all identified as other top areas with potential for learning.</p> <ul style="list-style-type: none"> <li>- <b>Focus on cancer diagnosis based on quantitative and qualitative feedback and insight of data.</b></li> <li>- Relates to pathways, processes or systems that crosscut our services.</li> </ul>
3	Prescribing or administration error or near miss of anticoagulation medication	<ul style="list-style-type: none"> <li>- ‘Medication errors-administration and prescribing’ identified as high potential for learning in stakeholder engagement.</li> <li>- Potential to identify learning related to: <ul style="list-style-type: none"> <li>• Communication between staff/teams</li> <li>• Delays in treatment</li> <li>• Communication – incorrect or insufficient monitoring</li> </ul> </li> </ul> <p>which were all identified as other top areas with potential for learning.</p> <ul style="list-style-type: none"> <li>- <b>Focus on anticoagulation based on quantitative and qualitative feedback and insight of data.</b></li> </ul>

## 6.0 Our patient safety incident response plan: national requirements

In addition to the five local patient safety priorities, the Trust must comply with the following national patient safety event response requirements.

No.	National Priorities	Action Required	Lead Body for response
1.	Deaths thought more likely than not due to problems in care (incidents meeting the learning from deaths criteria for PSII)	Locally Led PSII.	The Trust
2.	Deaths of patients detained under the Mental Health Act (1983) or where the Mental Capacity Act (2005) applies, where there is reason to think that the death may be linked to problems in care (incidents meeting the learning from deaths criteria)	Locally Led PSII.	The Trust
3	Incidents meeting the Never Events criteria 2018, or its replacement.	Locally Led PSII.	The Trust
4	Mental health-related homicides	Referred to the NHS England Regional Independent Investigation Team (RIIT) for consideration for an independent PSII.  Locally-led PSII may be required.	As decided by the RIIT

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

5	<p>Maternity and neonatal incidents meeting Healthcare Safety Investigation Branch (HSSIB) criteria or Special Healthcare Authority (SpHA) criteria when in place</p> <p>HSSIB will investigate the following maternity safety incidents;</p> <ul style="list-style-type: none"> <li>• Intrapartum stillbirth: the baby was thought to be alive at the start of labour but was born showing no signs of life.</li> <li>• Early neonatal death: the baby died, from any cause, within the first week of life (0 to 6 days).</li> <li>• Potentially severe brain injury diagnosed in the first seven days of life and the baby was diagnosed with grade III hypoxic–ischaemic encephalopathy; or was therapeutically cooled (active cooling only); or – had decreased central tone, was comatose and had seizures of any kind.</li> <li>• • Maternal deaths: death while pregnant or within 42 days of the end</li> </ul>	<p>Refer to HSSIB or SpHA for independent PSII.</p> <p>Where such an investigation is undertaken, a separate local patient safety learning response is not required. However, organisations should complete Duty of Candour requirements (ahead of handover to HSSIB for further involvement of patients/families in the investigation) as set out below, and report on the relevant incident reporting system(s) as described below.</p> <p>Organisations must also take any immediate actions identified as necessary to avoid and/or mitigate further serious and imminent danger to patients, staff and the public.</p> <p>In relevant cases, the organisation should also use the Perinatal Mortality Review Tool (in parallel with and with the assistance of HSSIB as it works through its independent investigation).</p>	HSSIB (or SpHA)

## 7.0 Our patient safety incident response plan: local focus

The Trust will be flexible with its investigative approach, informed by the national and local priorities detailed within this plan. An established 'Daily Triage' group will triangulate events captured through a variety of routes (i.e., incidents, complaints etc.) and agree the most appropriate response based on the potential for learning, improvement and systemic risk.

National Guidance recommends that 3 – 6 investigations per priority are conducted.

The table below details the number of Patient Safety Incident Investigations (PSII) which will be undertaken for the Trust's identified priorities:

No	Priority	Planned response	Number of PSII
1	Delayed recognition of a deteriorating patient, due to gaps in monitoring (including all pregnant women)	Patient Safety Incident Investigation (PSII)	5
2	Delayed, missed or incorrect cancer diagnosis	Patient Safety Incident Investigation (PSII)	5
3	Prescribing or administration error or near miss of anticoagulation medication	Patient Safety Incident Investigation (PSII)	5
4	Adverse Discharge due to gaps in communication or misinformation	Patient Safety Incident Investigation (PSII)	5

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

5	Delay in responding to a critical pathology finding	Patient Safety Incident Investigation (PSII)	5
---	---	--	---

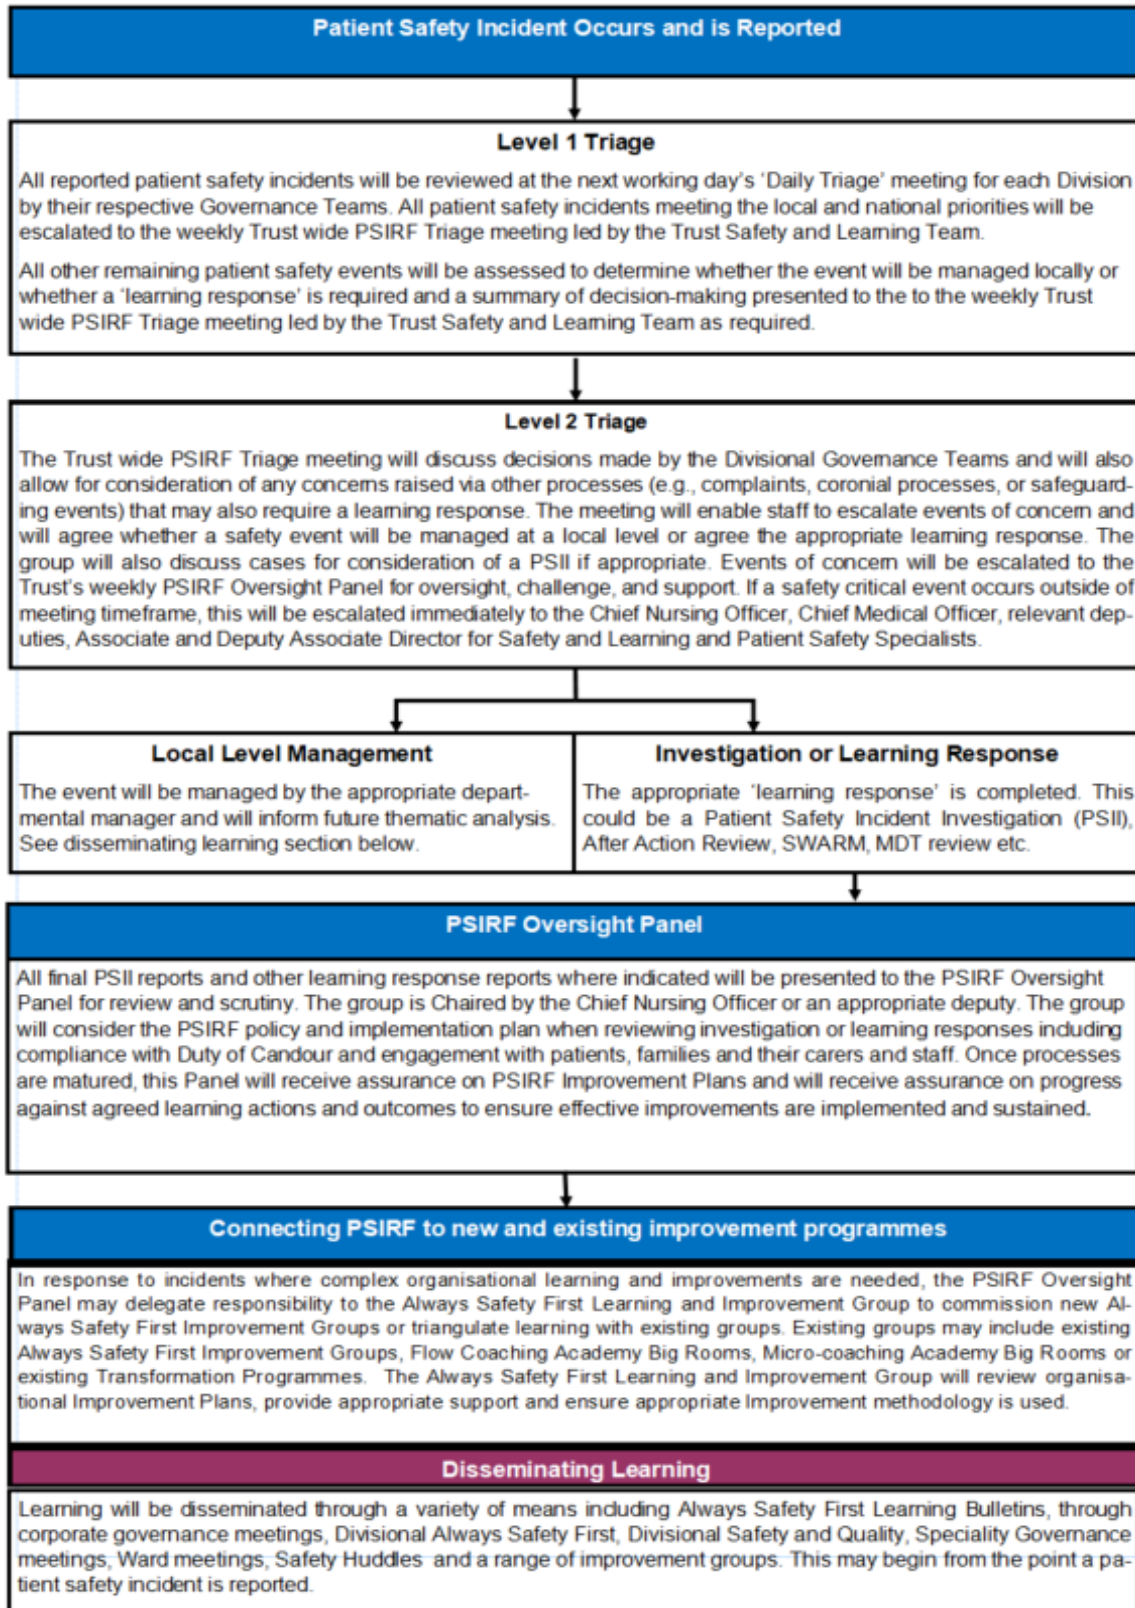

Safety events which previously met the Serious Incident Framework’s definition of a ‘serious incident’ do not need to be routinely investigated using the PSII process.

By undertaking PSII investigations for events that do not meet the criteria of the identified patient safety priorities, the Trust runs the risk of recreating the Serious Incident Framework.

## 8.0 How we will respond to patient safety events

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

The infographic below describes the governance arrangements in relation to how the Trust will respond to a patient safety event.

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

The infographic below describes how patient safety events assessed under the national priorities, local priorities and local level criteria will be managed and how improvement plans will be developed.

How We Will Respond to Patient Safety Events				
	Event	Approach	Improvement	
Patient Safety Event Occurs	National Priorities	Maternity Incidents meeting HSSIB criteria	Referred to Healthcare Services Safety Investigation Branch (HSSIB)	Respond to recommendations from external referred agency/organisation as required.  Learning and improvement plans will feed into improvement programmes where appropriate.
		Neonatal Incidents meeting HSSIB criteria		
		Child Death	Initiate child death review process	
		Death of person with learning disabilities	Refer for Learning Disabilities Mortality Review (LeDeR)	
		Safeguarding incidents meeting criteria	Reported to Local Authority and Trust's Safeguarding Team	
		Incidents in screening programmes	Reported to Public Health England (PHE)	
		Death of patients in custody/prison/probation	Reported to Prison and Probation Ombudsman (PPO) or the Independent Office for Police Conduct (IOPC)	
		Mental Health related homicides	Referred to NHSE Regional Independent Investigation Team for consideration of independent PSII	
		Domestic homicides	Identified by the Police in partnership with Community Safety Partnership (CSP) who will review the case	
		Patient Safety Event Occurs	Local Priorities	
Incidents meeting the Never Event criteria				
Death of patient detained under the MHA or where the MCA applies				
Patient Safety Event Occurs	Local Level	<b>Patient Safety Priorities:</b> -Delayed recognition of a deteriorating patient, due to gaps in monitoring (including all pregnant women) -Delayed, missed or incorrect cancer diagnosis -Prescribing or administration error or near miss of anticoagulation medication -Adverse Discharge due to gaps in communication or misinformation -Delay in responding to critical pathology findings	Patient Safety Incident Investigation (PSII) - where agreed during triage	Create local organisational recommendations and actions.  Learning and improvement plans will be developed in conjunction with the improvement programme aligned to the relevant local priority.
Patient Safety Event Occurs	Local Level	Incidents resulting in moderate or severe harm to patient	Appropriate learning response agreed at Daily Triage	Inform thematic analysis of ongoing patient safety risks.  Learning and improvement plans will feed into improvement programmes where appropriate.
		No or Low Harm Patient Safety Incident	Local management with data reviewed for themes and trends, or appropriate learning response agreed at daily triage

Title: Patient safety incident response plan	

[Do you have the up to date version? See the intranet for the latest version](#)

## 9.0 Learning Responses

Some patient safety events will not require a PSII but may benefit from a different type of examination to gain further insight or address queries from the patient, family, carers or staff. A clear distinction is made between the activity, aims and outputs from reviews and those from PSIIIs.

The timeframes set are intended to be used as a guide and should be flexible if there are circumstances that require more in depth understanding.

### 9.1 Types of learning responses

The table below gives an overview of the different types of learning responses.

Type of learning response	Description	Timeframe
Patient Safety Incident Investigation (PSII)	A PSII offers an in-depth review of a single patient safety incident or cluster of incidents to understand what happened and how. These will be undertaken using Systems Engineering Initiative for Patient Safety (SEIPS) methodology.	To be agreed in discussion with those affected, particularly the patient(s) and/or their carer(s), where they wish to be involved in such discussions. Depending on discussions with stakeholders, to be

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

Type of learning response	Description	Timeframe
		completed within 3 months and/or no longer than 6 months.
Multidisciplinary (MDT) Team Review	An MDT review supports health and social care teams to identify learning from multiple patient safety incidents (including incidents where multiple patients were harmed or where there are similar types of incidents). This could include incidents that occurred in the significant past and/or where it is more difficult to collect staff recollections of events either because of the passage of time or staff availability. The aim is, through open discussion (and other approaches such as observations and walk throughs undertaken in advance of the review meeting(s)), to agree the key contributory factors and system gaps that impact on safe patient care.	Ordinarily within 20 working days of being commissioned.
SWARM	The swarm huddle is designed to be initiated as soon as possible after an event and involves an MDT discussion. Staff 'swarm' to the site to gather information about what happened and why it happened as quickly as possible and (together with insight gathered from other sources wherever possible) decide what needs to be done to reduce the risk of the same thing happening in future	Ordinarily within 10 working days of the event being identified to allow for SWARM and documentation

Lancashire Teaching Hospitals NHS Foundation Trust	ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027
Title: Patient safety incident response plan	
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>	

Type of learning response	Description	Timeframe
		to be completed.
After action review (AAR)	<p>AAR is a structured facilitated discussion of an event, the outcome of which gives individuals involved in the event understanding of why the outcome differed from that expected and the learning to assist improvement. AAR generates insight from the various perspectives of the MDT and can be used to discuss both positive outcomes as well as incidents.</p> <p><b>It is based around four questions:</b></p> <ol style="list-style-type: none"> <li>1. What was the expected outcome/expected to happen?</li> <li>2. What was the actual outcome/what actually happened?</li> <li>3. What was the difference between the expected outcome and the event?</li> <li>4. What is the learning?</li> </ol>	Ordinarily within 20 working days of the event being reported.
Thematic Review	<p>A thematic review can identify patterns in data to help answer questions, show links or identify issues. Thematic reviews typically use qualitative (i.e., Incident reports, Complaints data etc.) rather than quantitative data to identify safety themes and issues.</p> <p>Thematic Reviews can be used for multiple purposes, including:</p> <ul style="list-style-type: none"> <li>• Developing or revising our Safety Improvement Profile</li> </ul>	As agreed by the PSIRF Oversight Panel or Divisional Management Team or relevant other

Lancashire Teaching Hospitals NHS Foundation Trust	ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027
Title: Patient safety incident response plan	
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>	

Type of learning response	Description	Timeframe
	<ul style="list-style-type: none"> <li>• Aggregating information from many diverse sources of safety intelligence datasets.</li> <li>• Gathering insight about gaps / safety issues across a pathway or as part of an overarching safety theme to direct further analysis</li> <li>• Aggregating findings from multiple incident responses to identify interlinked contributory factors to inform / direct improvement efforts.</li> <li>• Presenting summary data to show the impact of ongoing safety improvement work.</li> </ul>	

## 9.2 Anticipated time commitment for completion of learning responses

The table describes the estimated time commitment for each category response type. This has been calculated using guidance from peer organisations.

Response type	Category	Time Commitment
PSII	Local Priorities defined PSII's	<p><b>Minimum 60 hours per investigation for:</b></p> <ul style="list-style-type: none"> <li>• 1 lead investigator</li> <li>• 1 support investigator</li> </ul> <p><b>Up to 30 hours per investigation for:</b></p> <ul style="list-style-type: none"> <li>• subject matter expertise</li> <li>• family liaison</li> </ul> <p><b>Plus</b></p> <p><b>Up to 30 hours per investigation for:</b></p> <ul style="list-style-type: none"> <li>• investigation oversight and support</li> <li>• administration support</li> <li>• interview and statement time of staff involved in the incident</li> </ul>

Lancashire Teaching Hospitals NHS Foundation Trust	ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027
Title: Patient safety incident response plan	
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>	

		Time commitments may vary per PSII and therefore subject to further review.
PSII	National Priorities	<p><b>Minimum 60 hours per investigation for:</b></p> <ul style="list-style-type: none"> <li>• 1 lead investigator</li> <li>• 1 support investigator</li> </ul> <p><b>Up to 30 hours per investigation for:</b></p> <ul style="list-style-type: none"> <li>• subject matter expertise</li> <li>• family liaison</li> </ul> <p><b>Plus</b></p> <p><b>Up to 30 hours per investigation for:</b></p> <ul style="list-style-type: none"> <li>• investigation oversight and support</li> <li>• administration support</li> <li>• interview and statement time of staff involved in the incident.</li> </ul> <p>Time commitments may vary per PSII and therefore subject to further review.</p>
Various	Local Level	<b>Maximum eighteen hours per response review</b>

### 9.3 Anticipated number of learning responses

Based on a comparison of data between September 2021 and August 2023, the trust has also calculated the anticipated number of learning responses.

Response type	Category	Anticipated Number of Responses
PSII	Local Priorities defined PSII's	25 (Based on this plan)
PSII	National	Deaths thought more likely than not due to problems in care

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27	
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan	
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>			

	Priorities	(incidents meeting the learning from deaths criteria for PSII)  Approximately 22 per year based on an average of incidents graded as 'Death' and reported to Strategic Executive Information System (StEIS) over the past 2 years.
PSII	National Priorities	Deaths of patients detained under the Mental Health Act (1983) or where the Mental Capacity Act (2005) applies, where there is reason to think that the death may be linked to problems in care (incidents meeting the learning from deaths criteria)  The Trust does not currently categorise incidents in this group and therefore difficult to estimate this number.
PSII	National Priorities	Incidents meeting the Never Events criteria 2018, or its replacement.  2-4 per year based on range of Never Events over the past 2 years,
Various	Local Level	<u>Incidents Resulting in Moderate or Severe Harm to Patient.</u>  <b>Average Investigations Undertaken:</b> The below provides an average number of investigations initiated in a financial year based on severe and moderate harm level (calculated based on the previous 2 years).  135 (72 Hour Review) 82 (RCAs) = equivalent to 217 learning responses  <b>Local RCAs:</b> The below provides an average number of Local RCAs initiated in a financial year (based on data from the previous

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

		<p>2 years).</p> <p>48 (Inpatient Falls)</p> <p>1 (Delay for Cancer Treatment)</p> <p>148 (Clostridium Difficile)</p> <p>1 (MRSA PIR)</p> <p>166 (Acute Tissue Viability Cat 2 and above)</p> <p>5 (VTE)</p> <p>5 (Section 42 Safeguarding)</p> <p>3 (Maternity Incidents – 3<sup>rd</sup>/4<sup>th</sup> degree tears and PPH &gt;1500mls)</p> <p>= equivalent to 377 learning responses.</p> <p>Learning responses for these categories may include:</p> <ul style="list-style-type: none"> <li>• Thematic Review</li> <li>• PIR</li> <li>• MDT round table discussion</li> <li>• SWARM</li> <li>• After Action Review</li> </ul> <p><u>Incidents Resulting in low or no harm</u></p> <p><b><i>Average Investigations Undertaken:</i></b></p> <p>The below provides an average number of investigations initiated in a financial year based on low or no harm level (calculated based on the previous 2 years).</p> <p>23 (Section 42 Safeguarding)</p> <p>1008 (Violence and Aggression incidents)</p> <p>218 (Absconding/Missing patients)</p> <p>609 (Patient safety events linked to communication between staff/teams)</p>
--	--	---

Lancashire Teaching Hospitals NHS Foundation Trust	ID No. Plan-27	
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

		<p>24 (Maternity Incidents – 3<sup>rd</sup>/4<sup>th</sup> degree tears and PPH &gt;1500mls) = equivalent to 1882 learning responses*</p> <p>*However, in line with PSIRF it is likely that for ‘violence and aggression’ and ‘patient safety events linked to communication between staff/teams’, the Trust will undertake a series of thematic reviews where appropriate. Due to the broad categorisation of this incidents, the Trust will also consider as part of the triage process whether categorisation of the incidents reported are appropriate.</p> <p>Learning responses for these categories may include:</p> <ul style="list-style-type: none"> <li>• Thematic Review</li> <li>• PIR</li> <li>• MDT round table discussion</li> <li>• SWARM</li> <li>• After Action Review</li> </ul> <p>The numbers of anticipated thematic reviews under PSIRF are difficult to estimate at this current time.</p>
--	--	---

The table above does not capture learning responses for those patient safety events that may need to be reported externally that do not fit into the current PSIRF national and local priorities criteria. The table is also based on data at the time of producing this incident response plan and likely to be subject to some variation. Therefore, it is anticipated that the number of learning responses managed at local level may be higher than the numbers currently estimated above.

Lancashire Teaching Hospitals NHS Foundation Trust	ID No. Plan-27	
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

## 9.4 Capacity assessment

To ensure learning responses are conducted in line with the PSIRF professional standards and to understand the organisation's capacity to respond to patient safety events, a skill mix review has been undertaken. This has been supported by an analysis of the numbers and training of staff with a specific role in patient safety incident responses, as well as how other staff will be expected to support such responses.

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

## 10.0 Our patient safety improvement approach

The Trust is committed to ensuring PSIRF implementation is intrinsically linked to the Trust's programmes of improvement so that learning outcomes utilise evidence-based improvement methodology to create sustainable change in the delivery of safe care for our patients and to build on the existing culture of continuous improvement within the organisation.

In line with the Trust's Continuous Improvement Strategy, improvement programmes at Lancashire Teaching Hospitals NHS Foundation Trust are organised at macro (system and organisation), meso (pathway) and micro (individual ward and department) levels.

Where opportunities for learning are identified from PSIRFs or other learning responses, these will be connected to improvement programmes of work if appropriate. This will not only be undertaken reactively when things have not gone well but also proactively whilst considering the principles of Safety II by learning from things that have gone well and exploring how more of this can be achieved. Where existing improvement programmes of work do not exist, the PSIRF Oversight Panel will determine whether a new improvement programme is required. The PSIRF Oversight Panel may delegate this responsibility to the Always Safety First Learning and Improvement Group.

Once learning has been identified from Patient Safety Incident Investigations, each local priority will have an associated improvement programme. These programmes will be co-designed with frontline teams who are delivering the services with a patient and staff focused outcome at their core and will have an aim, driver diagram, project outline, recognised continuous methodology, baseline measures and measurement and evaluation plans. The programmes will also be tailored to fit the circumstances of the programme utilising a variety of approaches such as: Break Through Series Collaborative to individual support, guidance and coaching maximising the use of technology where appropriate to help achieve the greatest benefit.

At the point that an improvement need has been identified, improvement plans will be co-produced with members from the associated improvement group, including patients,

Lancashire Teaching Hospitals NHS Foundation Trust	ID No. Plan-27

<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

carers and families and staff with support from the continuous improvement teams if required to identify outcome measures and actions to then be shared.

Once processes are matured, the PSIRF Oversight Panel will receive assurance on PSIRF Improvement Plans relating to the Trust's Patient Safety Priorities and will receive assurance on against agreed learning actions and outcomes to ensure effective improvements are implemented and sustained.

Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

## 11.0 Transition to PSIRF

The implementation of PSIRF will commence on 06 November 2023 in a phased approach following Board and ICB approval. There will be a period of transition from the previous Serious Incident Framework and the new PSIRF with a plan for full implementation of PSIRF expected by the 31 March 2024.

To ensure successful implementation of the PSIRF policy and plan, the Trust has engaged and will continue to engage with a number of stakeholders including patients, families, carers and staff, other acute Trusts within the ICS to capture learning, the Care Quality Commission (CQC), our regulators, the ICB who are responsible for approving this plan and ensuring collaborative work across the local ICS and a range of advocacy groups such as Healthwatch.

It is recognised the implementation of PSIRF will require continued review, reflection and learning across the NHS. This document is intended to be evolving in nature and sets out the pertinent parts of the implementation process. -

### 13.0. TRAINING

#### TRAINING

Is training required to be given due to the introduction of this policy? Yes

The Trust has committed to ensuring that we fully embed the PSIRF and meet its requirements. We have therefore used the NHS England patient safety response standards (2022) to frame the resources and training required to allow for this to happen. A summary of the training requirements can be found in the [PSIRF Policy](#).

## DEFINITIONS / GLOSSARY OF TERMS

Abbreviation or Term	Definition
AAR	<b>After Action Review</b> A learning response tool consisting of a structured facilitated discussion of an event/incident
CQC	<b>Care Quality Commission</b> Independent regulator for health and social care in England
CSP	<b>Community Safety Partnership</b> Statutory partnerships of organisations who work together in an area to reduce crime and the fear of crime, anti-social behaviour, alcohol, and drug misuse and reducing re-offending
Core20PLUS5	<b>Core20PLUS5</b> A national NHS England approach to inform action and reduce healthcare inequalities at both national and system levels, focused initially on the experience of adults, but has now been adapted to apply to children and young people
DHR	<b>Domestic Homicide Review</b> A review into the circumstances around a death of a person following domestic abuse
HealthWatch	<b>HealthWatch</b> A health and social care champion service who obtain the views of people about their needs and experience of local health and social care services
HSSIB	<b>Healthcare Services Safety Investigation Body</b> The independent national investigator for patient safety in England
ICB	<b>Integrated Care Board</b> A statutory organisation who are responsible for developing a plan for meeting the health needs of the local population, managing the NHS budget, and arranging for the provision of NHS services in a geographical area
ICS	<b>Integrated Care System</b>

Lancashire Teaching Hospitals NHS Foundation Trust	ID No. Plan-27	
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

	Partnerships of organisations which come together to deliver joined up health care services and improve the lives of people who live in the area
IOPC	<b>Independent Office for Police Conduct</b> A non-departmental public body in England and Wales who are responsible for overseeing the system for handling complaints made against police forces in England and Wales
LeDeR	<b>Learning Disability and Mortality Review</b> A service improvement programme for people with a learning disability and autistic people who look at key episodes of health and social care the person received that may have been relevant to their overall health outcomes
LFPSE	<b>Learning from Patient Safety Events</b> The new national NHS service for the recording and analysis of patient safety events
LTHTR	<b>Lancashire Teaching Hospitals NHS Foundation Trust</b>
Magnet4Europe	<b>Magnet4Europe</b> A four-year Horizon project that aims to improve mental health and wellbeing among health professionals in Europe
MDT	<b>Multi-Disciplinary Team</b> A group of staff from different areas in healthcare
NRLS	<b>National Reporting and Learning System</b> The current national central database for recording and analysing patient safety incident reports
PALS	<b>Patient Experience and Liaison Service</b> The Trust's team which provides support for patients, families, and carers
PPO	<b>Prison and Probation Ombudsman</b> A public body that carries out independent investigations into complaints and deaths in custody
PSIRF	<b>Patient Safety Incident Response Framework</b> A new and innovative approach to the way the NHS responds to patient safety incidents/events.
PSIRP	<b>Patient Safety Incident Response Plan</b> The plan which sets out how NHS organisations intend to respond to patient safety incidents/events under PSIRF
PSP	<b>Patient Safety Partners</b> The role that patients, carers and other lay people can play in supporting and contributing to a healthcare organisations' governance and management processes for patient safety
PSII	<b>Patient Safety Incident Investigation</b>

Lancashire Teaching Hospitals NHS Foundation Trust		ID No. Plan-27
Version No: 1.1	Next Review Date: 30/11/2027	Title: Patient safety incident response plan
<a href="#">Do you have the up to date version? See the intranet for the latest version</a>		

	A learning response tool which is undertaken when an incident or near miss indicates significant patient safety risks and the potential for new learning
Safety I	<b>Safety I</b> Identifying causes and contributing factors in patient safety events as the focus point in an attempt to stop them occurring
Safety II	<b>Safety II</b> Considering variations in everyday performance to understand how things usually go right
SEIPS	<b>Systems Engineering Initiative for Patient Safety</b> A methodology for understanding outcomes within complex socio-technical systems
SIF	<b>Serious Incident Framework</b> The current process by which the NHS ensures serious incidents are identified, investigated, and learned from to prevent the likelihood of similar incidents happening again. This framework will be replaced by PSIRF
SOP	<b>Standard Operating Procedure</b> A guide/step by step instructions compiled by an organisation to help staff to carry out routine tasks/processes
SpHA	<b>Special Healthcare Authority</b> An authority who provides a health service to the whole of England, not solely to a local community
STP	<b>Sustainability and Transformation Partnership</b> Where local NHS organisations and Local Authorities draw up shared proposals to improve health and care in the areas they serve

## Appendix 1 – Assessment criteria for identifying local priorities.

Likelihood of Harm				
1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost Certain
This will probably never happen/recur	Do not expect it to happen/recur but it is possible it may do so.	Might happen or recur occasionally	Will probably happen / recur but it is not a persisting issue	Will undoubtedly happen/recur, possibly frequently
Not expected to occur for years	Expected to occur at least annually.	Expected to occur at least monthly	Expected to occur at least weekly	Expected to occur at least daily
Probability = <0.1% (<1 in 1000)	Probability = 0.1 – 1% (1 in 1000 to 1 in 100)	Probability = 1 – 10% (1 in 100 to 1 in 10)	Probability = 10 – 50% (1 in 10 – 1 in 2)	Probability = >50% (more than 1 in 2)
Impact of Harm				
1 Insignificant	2 Minor	3 Moderate	4 Major	5 Catastrophic
Minimal injury requiring no/minimal intervention or treatment.	Minor injury or illness, requiring minor intervention  Increase in length of hospital stay by 1-3 days.	Moderate injury requiring professional intervention  Increase in length of hospital stay by 4-15 days	Major incident leading to long-term incapacity/disability  Increase in length of hospital stay by >15 days  Mismanagement of patient care with long-term effects	Incident leading to death  Multiple permanent injuries or irreversible health effects  An event which impacts on a large number of patients
Confidence in Existing Improvement Work				
1 Extremely Confident	2 Very Confident	3 Some Confidence	4 Low Level of Confidence	5 No Confidence at All
You are aware of existing improvement work.  The improvement work had eradicated patient safety events.	You are aware of existing improvement work.  The improvement work has almost eradicated patient safety events/or significantly reduces these. However, these do occasionally occur.	You are aware of some existing improvement work.  The improvement work has made an impact and significant events have reduced but do continue to happen but are significantly less frequent.	You are aware of some existing improvement work.  The improvement work has resulted in some reduction in patient safety events but significant events continue to happen.	You are not aware of any existing improvement work.  You are aware of existing improvement work but patient safety events continue to happen at a similar rate/severity.
Potential for New Learning				
1 No Potential for Learning	2 Slight Potential for Learning	3 Some Potential for Learning	4 Low Level of Confidence	5 Significant Potential or Learning
The theme is well known throughout the Trust and the Trust has exhausted all improvement / learning opportunities.	The theme is well known throughout the Trust and the Trust has existing improvement measures in place which are addressing the learning from this theme.	The theme is known and there may have historically been improvement work that made an impact. However, this was not sustained.	The theme is known but there is no existing improvement work or no evidence that existing improvement work is having an impact.	The theme is unknown and there is no pre-existing improvement work within the Trust.

- 3) If your assessment identifies a negative impact on Equality Groups you must develop an action plan **to avoid discrimination and ensure opportunities for promoting equality diversity and inclusion are maximised.**
- This should include where it has been identified that further work will be undertaken to further explore the impact on equality groups
  - This should be reviewed annually.

## HOW THE NHS CONSTITUTION APPLIES TO THIS DOCUMENT

<b>WHICH PRINCIPLES OF THE NHS CONSTITUTION APPLY?</b> <a href="#">Click here for guidance on Principles</a>	Tick those which apply	<b>WHICH STAFF PLEDGES OF THE NHS CONSTITUTION APPLY?</b> <a href="#">Click here for guidance on Pledges</a>	Tick those which apply
1. The NHS provides a comprehensive service, available to all. 2. Access to NHS services is based on clinical need, not an individual's ability to pay. 3. The NHS aspires to the highest standards of excellence and professionalism. 4. The patient will be at the heart of everything the NHS does. 5. The NHS works across organisational boundaries. 6. The NHS is committed to providing best value for taxpayers' money. 7. The NHS is accountable to the public, communities and patients that it serves.	✓ ✓ ✓ ✓ ✓ <input type="checkbox"/> ✓	1. Provide a positive working environment for staff and to promote supportive, open cultures that help staff do their job to the best of their ability. 2. Provide all staff with clear roles and responsibilities and rewarding jobs for teams and individuals that make a difference to patients, their families and carers and communities. 3. Provide all staff with personal development, access to appropriate education and training for their jobs, and line management support to enable them to fulfil their potential. 4. Provide support and opportunities for staff to maintain their health, wellbeing and safety. 5. Engage staff in decisions that affect them and the services they provide, individually, through representative organisations and through local partnership working arrangements. All staff will be empowered to put forward ways to deliver better and safer services for patients and their families. 6. To have a process for staff to raise an internal grievance. 7. Encourage and support all staff in raising concerns at the earliest reasonable opportunity about safety, malpractice or wrongdoing at work, responding to and, where necessary, investigating the concerns raised and acting consistently with the Employment Rights Act 1996.	✓ ✓ ✓ ✓ ✓ ✓ ✓
