

Welcome to the LeAPH Clinic

The LeAPH (Lancashire Antenatal Pre-Eclampsia and Hypertension) Clinic is a service caring for those who have high blood pressure outside of pregnancy or have had a previous pregnancy complicated by high blood pressure and/or pre-eclampsia.

We offer extra support and monitoring throughout your pregnancy journey which involves closely observing your blood pressure, testing your urine for protein and carrying out any additional blood tests needed to further monitor yours and your baby's condition.

The growth of your baby will be monitored closely, and any scans required will be arranged.

You will have the opportunity to monitor your blood pressure at home and upload your results to the BadgerNet App, where the team will be able to review them.

You will be seen in the LeAPH Clinic as often as your pregnancy journey needs, some of your care may also be carried by your local midwife to minimise any unnecessary visits to the hospital.

The clinic is lead by Dr Emma Ingram, Consultant Obstetrician and Lisa Cook, Specialist Midwife for Maternal Medicine who are supported by experienced staff from the hospital team.

The contact telephone number for the clinic is 01772 524448. This phoneline may be busy but please persevere if you have any queries about your clinic appointment.

If you need advice urgently, please call maternity triage on 01772 524495.
